```
* 微信native顾客需要获取微信用户标识以完成微信JSAPI支付
     * 检查一下是否已经存在微信用户标识code,如果不存在则需要获取
     * 将role存入localstorage,等到下单后再将localstorage内role存入redux中
    if (payTypeJson === Mode.CUSTEMER && Boolean(getCodeFromHref()) === false
      && (order.payState !== OrderPayState.SUCCESS && UserAgent.isWechat)) {
      localStorage.setItem(OrderUniqueKey.ROLE, JSON.stringify(role))
      localStorage.setItem(OrderUniqueKey.USERID, JSON.stringify(role.userId || user.id))
      window.location.href = getWechatNativeCodeURL()
     } else {
      this.setState({ order },()=>this.fetchBalance())
     <Header title="支付订单" showBackButton={true} onBack={() => {
      * 如果存在微信用户code则表示回退键会回退到微信开放平台url,
      * 如果存在alipay的参数则回退会回到支付宝支付页
      *需要重新指定回退首页
      if (Boolean(getCodeFromHref()) | window.location.href.includes('method=alipay.trade.wap.pay.return')) {
       window.history.pushState(", ", ")
       window.location.href = `${window.location.origin}/#/mobile/menkor/restaurant/${match.params.affairId}/or
der/${match.params.orderld}/detail`
      } else {
       history.goBack()
      }}}
```
