```java
@Override
public boolean editTimer(long affairId, TimerForm form) {
    if (form.getBegin() != null && form.getEnd() != null) {
        setTimerForm(form);
        if (checkOverlap(affairId, form.getId(), new Timestamp(form.getBegin()), new Timestamp(form.getEnd()))) {
            throw new ErrorCodeException(ResponseCode.EXIST_OVERLAP_ANNOUNCEMENT,
                    "出品时间段重复");
        }
    }
    TimerEntity entity = timerDao.queryById(form.getId());
    if((form.getBegin()!=null&&form.getBegin()<entity.getBeginTime().getTime())
            ||(form.getEnd()!=null&&form.getEnd()>entity.getEndTime().getTime())
        &&checkHasOrder(affairId,entity.getBeginTime(),entity.getEndTime())){
        throw new ErrorCodeException(ResponseCode.HAS_ORDER,"该时间段已有订单");
    }
    if (form.getName() != null) {
        entity.setName(form.getName());
    }
    if (form.getBegin() != null) {
        entity.setBeginTime(new Timestamp(form.getBegin()));
    }
    if (form.getEnd() != null){
        entity.setEndTime(new Timestamp(form.getEnd()));
    }
    return entity.update();
}
```
